Theme 001 for Prestashop

Designed by template-help - www.template-help.com
Created on Prestashop v. 1.3.1

Installation

− Having the package downloaded, extract the contents of the **theme** folder to your Prestashop installation root directory.
− Patch your prestashop database with the provided source/dump.sql **(only if you want sample contents)** Warning! Patching the database with our sql dump will remove your data, so please back it up before patching.
− Log into Prestashop administration panel, go to *Preferences → Appearance* and select your theme in the *Themes* tab.

Settings of modules as on our livedemo preview

Go to the *Modules → Positions* and set up modules as on our demo preview:

Module name	Position	Order
Quick Search block v1.0	Top of pages	1
Permanent links block v0.1	Top of pages	2
User info block v0.1	Top of pages	3
Categories block v1.0	Left column blocks	1
Manufacturers block v1.0	Left column blocks	2
Tags block v1.0	Left column blocks	3
Block advertising v0.1	Left column blocks	4
Block Banner v0.1	Left column blocks	5
Cart block v1.2	Right column blocks	1
Specials block v0.8	Right column blocks	2
Block Banner2 v0.1	Right column blocks	3
Block Banner3 v0.1	Right column blocks	4
